Software Engineer

Detail-oriented and results-driven Laravel Developer with 2.7 years of hands-on experience in developing robust web applications. Highly skilled in Laravel, PHP, and SQL, with a strong command of HTML, CSS, Bootstrap, Tailwind CSS, and jQuery. Committed to writing clean, maintainable code and delivering high-performance solutions. Comfortable working in agile teams and fast-paced software environments.

WORK EXPERIENCE

Software House **07/2021 - Present**
Laravel Developer • Full-time **Chungi Number 6 , Multan**

- Led development of multiple Laravel-based applications with custom business logic and modular architecture.
- Developed and consumed RESTful APIs for internal and external services.
- Built and styled responsive UIs using Tailwind CSS, Bootstrap, and jQuery.
- Ensured high performance, scalability, and security across projects.
- Worked directly with clients to understand requirements, resolve bugs, and implement feedback quickly.

Laravel Developer

- Supported senior developers in full-stack Laravel projects.
- Created clean, efficient PHP/Laravel code and handled database queries in MySQL.
- Designed responsive layouts using Bootstrap and integrated dynamic elements with jQuery.
- Participated in daily stand-ups and contributed to successful project deliveries.

EDUCATION

Bachelor's in Computer Science
Punjab Group of college Multan, Pakistan
