PROFESSIONAL SUMMARY

Laravel Backend Developer with 2+ years of experience building backend systems for a production SaaS platform used by mobile repair businesses. Have worked across POS, phone repair management, inventory tracking, booking, and customer support modules — using Laravel, PHP, MySQL, and RESTful APIs to connect these systems into one platform. Comfortable working independently on backend logic, API design, and database structure, and collaborating with a frontend team and product stakeholders in an Agile/Scrum environment. Looking for a remote Laravel Backend Developer or Software Engineer role where I can keep building on real production systems.

CORE COMPETENCIES

- **Backend Development:** Laravel, PHP, MVC Architecture, Eloquent ORM
- **API & Integration:** RESTful API Design, API Integration, Authentication & Authorization, Postman
- **Databases:** MySQL, PostgreSQL, SQL, Database Design, Query & Performance Optimization
- **Frontend:** JavaScript, jQuery, Bootstrap, Tailwind CSS, HTML5, CSS3, Responsive Design
- **Tools & Version Control:** Git, GitHub, GitLab, Jira, Composer, VS Code, Linux (Ubuntu)
- **Practices:** Agile/Scrum, Clean Code, Bug Fixing, Production Support, Remote Collaboration

PROFESSIONAL EXPERIENCE

Laravel Backend Developer — FoneSpot | July 2024 – Present

Remote | SaaS platform delivering POS, phone repair management, inventory tracking, booking, and customer support tools for mobile repair businesses

- Engineered and shipped core backend modules — POS, Repair Management, Inventory, and Booking — within FoneSpot's Laravel-based SaaS platform, giving mobile repair businesses a single system to manage day-to-day operations.
- Designed and maintained RESTful APIs consumed by the frontend team, defining consistent request/response contracts across the POS, repair, and booking modules, and testing endpoints with Postman.
- Built the repair ticket workflow, including status transitions, technician assignment, and customer notifications, to coordinate repair progress between staff and customers.
- Diagnosed and resolved production bugs across POS, inventory, and booking modules as part of ongoing platform maintenance and support.
- Optimized MySQL queries across POS, inventory, and booking modules to support day-to-day platform performance.
- Implemented authentication and authorization using Laravel's built-in auth system, including role-based access control in the Inventory module, to control access to business and customer data.
- Used Git, GitHub, and Jira within an Agile/Scrum workflow to manage version control, code review, and sprint planning.

EDUCATION & LANGUAGES

Intermediate in Computer Science (ICS) — Punjab Group of Colleges | Expected Graduation: 2026
Languages: English, Urdu
